SUMMARY

Product leader with 11 years across product and engineering, building AI-powered growth and monetization products at global scale. Lead product growth for Microsoft 365 Copilot, building contextual and viral experiences that reach 10M+ users and drive 75K+ paid seats. Track record of taking ambiguous zero-to-one bets to millions of users and eight-figure ARR across AI, ML, enterprise SaaS, and platform products.

CORE COMPETENCIES

AI Product Management · Product-Led Growth · Monetization & Pricing · Experimentation & A/B Testing · ML Ranking & Personalization · Propensity Modelling · Funnel Analytics · Enterprise SaaS · B2B Platforms · Identity & RBAC · Data Integration · SQL · Zero-to-One Product Development

WORK EXPERIENCE

Product Manager, Microsoft — Copilot Growth & Monetization

Dublin, Ireland | Apr 2023 – Present

- Lead viral and contextual monetization across Microsoft 365 Copilot, reaching 10M+ users and driving 75,000+ paid seats; contextual experiences sustain a 14% click-through rate, several times higher than conventional in-product promotion.
- Led zero-to-one product and growth strategy for Copilot Control System across Microsoft 365, scaling adoption to 150,000 commercial customers and generating \$14M in new annual recurring revenue.
- Designed and launched an ML-powered ranking service for 50M+ users, increasing click-through rate from 0.8% to 2% through improved targeting.
- Led License Optimizer, an ML propensity model that segments employees by Copilot readiness using Microsoft Office usage telemetry, driving ~2,000 license assignments per month.
- Defined experimentation strategy across Enterprise and SMB user journeys, using telemetry and funnel analysis to identify the biggest conversion gaps and shift product investment toward the areas most likely to improve license conversion.
- Scaled AI Administrator, a role-based access control capability for Microsoft 365 AI experiences, from zero to 64K+ admins across 55K+ tenants in six months, partnering with Security and Engineering to enable governed AI access for regulated industries.

Senior Product Manager / Specialist, SAP Signavio — Intelligent Analytics

Berlin, Germany | Oct 2022 – Apr 2023

- Owned product vision and execution for an enterprise Data Extraction platform, enabling scalable data ingestion for process-mining and transformation workflows used by large enterprise customers.
- Led an ETL-to-ELT migration for the core data ingestion pipeline, improving data quality and reducing ingestion failures by 17% while partnering with engineering on architecture and sequencing.
- Shipped self-service CSV ingestion and automated critical data-onboarding steps, reducing manual customer setup and improving time-to-insight by 10%.

Product Manager / Software Developer, SAP Labs — Business Cloud

Bengaluru, India | Apr 2015 – Sep 2021

- Led product development for key capabilities within SAP's cloud-native Master Data Management platform, working across engineering and partner product teams to shape requirements, roadmap priorities, and platform direction for enterprise customers.

- Presented product demos and roadmap updates to stakeholders and partner teams across SAP, using feedback to refine requirements, prioritize capabilities, and shape upcoming releases.
- Designed and launched core data integration services, including SAP Key Mapping, SAP_COM_0008, SAP_COM_0009, and BP Master Data SOAP Service, adopted by 10,000+ SAP customers and reducing the need for custom integrations.
- Combined API-based integration with ML-assisted data matching to detect duplicate and conflicting master data, improving data quality and reducing manual reconciliation for enterprise teams.
- Drove cross-product requirements across ERP, CRM, and other SAP applications, balancing product-specific needs, technical trade-offs, and shared platform dependencies to shape reusable MDM capabilities.

Business Analyst, Novoinvent Software

Noida, India | Jan 2015 – Mar 2015

- Defined requirements for mobile enrolment experiences supporting the Maryland Health Benefit Exchange, which served 600K+ Marylanders seeking health coverage in 2015.
- Partnered with engineering, design, and business stakeholders to translate complex insurance eligibility and policy requirements into intuitive mobile enrolment workflows for Qualified Health Plans and Medicaid.

EDUCATION

Master of Business Administration (MBA), Mannheim Business School

Germany | Dec 2022

Bachelor of Engineering, Computer Science, Jaypee Institute of Information Technology (JIIT)

India | Jul 2014
